Cyrano: A Video Game of the Round Table: Episode 1 - How to build and operate a video game studio. Description: Ever since Sega left the genre, no one has been able to capture the passion and fervor that a round table video game conjures. We know that the Metro Exodus will not be made. How then, can you channel your own enthusiasm for the past and present to build a round-table video game studio from scratch? In this game, Cyrano: A Video Game of the Round Table, the player is able to take on the role of a master game developer who has to create his or her own video game, from story-driven games to games that are meant to test cognitive skills. In other words, they have to come up with their own video games. The creator of the studio is an official Virtual-On game title. He asks the player to select his own music at the beginning. He wants to have a different music for each video game, such as Edvard Grieg's "Jupiter". The player will be able to play the game by moving a mouse to play the game.
