Aqm Alsalat is free for the basic use, however, if you want to have more features or certain benefits, then you can pay a one-time fee of \$4.99 for your prayer reminders, and \$6.99 for your custom prayer times. It's available for iOS and Android devices, and it has some more features as well. For example, it can also be used for phone calls instead of the conventional call function. Users who are interested can access the support options or check out the FAQs page for more details on certain topics. For example, if you want to know if there is a demo version available for Aqm Alsalat, you can visit its official website to find out.

[Neuroprotective properties of beta-hydroxy-beta-methylbutyrate, a hydrolysis product of the anserine of carnosine in Alzheimer disease]. The fact of carnosine being an antimutagen caused by its interaction with free radicals derived from metabolism of heterocyclic amines of carcinogenesis has been proved. It has been also shown that carnosine is associated with the expression of cell resistance against peroxidation. In a review the authors evaluate the current data on the properties of carnosine in a number of animal models of depression and the possibility of the use of the hydrolysis product of carnosine beta-hydroxy-beta-methylbutyrate as a neuroprotectant in the processes with the involvement of oxidative stress.

Stress and dental pain. The aetiology of stress-related symptoms and diseases has been discussed in the dental literature, and the relationship between stress and dental pain has been widely accepted. A number of possible stressor effects have been suggested, particularly on the peripheral and central nervous system, but the mechanisms are not fully understood. While psychological stress may lead to changes in the dental prosthesis, thus initiating the development of periapical lesions, dental pain appears to be related to physical as well as psychological factors. Current evidence supports the view that activity in the hypothalamus, possibly through the autonomic nervous system, is responsible for changes in the dental and oral-facial structures, which are, in turn, responsible for the formation and maintenance of dental pain.
