Mac OS X - Apple's macOS has been built upon the core services of NeXTSTEP. These include the native shell, the object file format, the scripting language (AppleScript), the object-oriented operating system services (e.g., AppleEvents) and the component technology (Carbon) also used in Mac OS X. AppleScript and AppleEvents are highly supported within AutoCAD. Microsoft Windows - Microsoft's Windows is the most widely used operating system for the desktop and for AutoCAD. AutoCAD has its own scripting language, Visual Basic for Applications (VBA), and the Microsoft ObjectARX SDK. AutoCAD includes a scripting environment based on Visual Basic Script and the AutoLISP language (in AutoCAD 2000). In AutoCAD 2007, it has evolved to AutoLISP 2 and Visual Basic.NET, and in 2011, it is able to accept source code written in the Python and Ruby programming languages. Linux - open source version of AutoCAD is available on Linux and Unix operating systems. Android - Android is a Linux-based operating system developed by the Google Inc. Android is available on a range of mobile devices such as smartphones and tablet PCs. AutoCAD plugin is developed for Android. Release history AutoCAD LT was initially released in the first quarter of 1999 with the first public version of AutoCAD R20 and was made freely available through the AutoCAD website. The first public release of AutoCAD LT was in the first quarter of 1999. AutoCAD LT version 2.0 was released on August 27, 2000, and featured significant improvements over AutoCAD LT 1.0. AutoCAD LT was the first edition of AutoCAD to support 2D drafting, support for the X,Y,Z reference system and AutoCAD's ability to read and write DXF files. AutoCAD LT was marketed by Autodesk and included the AutoCAD software and AutoCAD support. In January 2009, Autodesk released AutoCAD 2009 along with AutoCAD LT, and AutoCAD LT became an extension of AutoCAD 2009. In January 2015, Autodesk announced that AutoCAD LT was discontinued as a separate product, and was included in the release of AutoCAD 2016 as AutoCAD 2016 LT. What's New in the AutoCAD?

Flowline: Manage and share annotations and annotations as a stream of information. Annotation streams are an intuitive way to capture, tag and organize information about physical, functional and aesthetic items. Annotation stream layout allows you to visually browse through annotations in a 2D and 3D view. View the annotations at a glance, without the need to hover over each individual annotation. Support for 2019 AutoCAD vertical integration In October 2019, AutoCAD switched from Microsoft Visual Studio (MSVC) as its compilers. AutoCAD now builds using Intel's ICC compiler. This move brings AutoCAD into alignment with other major AutoCAD applications (e.g. Revit) and Autodesk products (e.g. BIM 360). As such, all AutoCAD applications benefit from advances made in the Microsoft compiler. As of AutoCAD 2023, Microsoft Visual Studio no longer works for AutoCAD. AutoCAD has a longstanding relationship with Intel. Since 1995, AutoCAD has used the Intel C and C++ compilers to build AutoCAD applications and work with Revit. With the 2019 release of AutoCAD, AutoCAD applications will continue to work with the same compilers as the other applications, and will continue to have access to the latest compiler technology. The following features are new in AutoCAD 2023 Simplified Flowline—streamline the creation of complex drawings by controlling the assembly of blocks with the Flowline tool. Simplified Manipulations—streamline the creation of complex drawings by controlling the assembly of blocks with the Manipulations tool. Shortcut Buttons—replace the mouse-only command buttons (e.g. T, S, B, W, and Z) with new shortcuts that make it quicker to accomplish common tasks. Unicode Input—input text in any Unicode character set and UTF-8, the most popular Unicode character set. Workgroup Collaboration—have one AutoCAD drawing that is open for multiple users at the same time. Designer-based UI The latest release of AutoCAD uses a new toolbox-based UI, which provides a cleaner, more modern look. The new UI provides a cleaner, more modern look
